Document 2 — Six-Page Meeting Pack

ATLAS Isseksi ProjectCo — Financial Partner Meeting Pack

Each section below corresponds to one page of the presentation pack.

Page 1 — Transaction Snapshot

A single Moroccan financial partner enters Isseksi ProjectCo / SPV through a USD 3.6M capital increase for up to 10% of ProjectCo, paid in three staged tranches of USD 1.2M, dedicated to the current expansion phase.

Term	Position
Vehicle	Isseksi ProjectCo / SPV
Structure	Capital increase — new money only
Contribution	USD 3.6M
Partner stake	Up to 10% after full payment
Payments	3 staged tranches × USD 1.2M
Monitoring	Quarterly review every 3 months
Future rounds	Priority participation (non-exclusive)
License transfer	None
Technology transfer	None
Operational control transfer	None

Page 2 — Why This Layer Exists

The Isseksi platform is entering its expansion phase. The capital requirement is operational, immediate, and precisely scoped:

- Mobile green copper processing station — the core production unit of the platform: modular processing, leaching, cementation, and water recovery.
- Quarry preparation — readiness of the four-quarry operating architecture.
- Working capital — labor, consumables, energy, and logistics continuity through ramp-up.

- Technical readiness — sampling, assays, QA/QC, and production verification discipline.
- Production scale-up discipline — staged deployment matched to demonstrated execution, not promises.

The 10% financial layer brings this liquidity without transferring control, without selling the license, and without opening the technology — building credibility for later strategic rounds.

Page 3 — Financial Structure

The partner's USD 3.6M is recognized as equity progressively against paid capital. The implied valuation is a structuring reference for negotiation and documentation; it should not be presented as an independently audited valuation unless later validated by a qualified financial advisor.

Valuation Reference	Amount
Investor contribution	USD 3.6M
Investor stake (full subscription)	10%
Implied post-money valuation	USD 36.0M
Implied pre-money valuation	USD 32.4M
Founder / Sponsor retained stake	90%

Page 4 — Three-Tranche Payment Plan

Tranche	Amount	Timing	Main Purpose	Release Condition	Equity
1	USD 1.20M	Signing / first closing	ProjectCo activation, governance setup, technical readiness, procurement planning	Signed SHA; ProjectCo account; approved Use of Funds; governance protocol	3.33%
2	USD 1.20M	After Gate 1	Mobile station procurement / development, quarry preparation, operating setup	Tranche 1 use report; technical execution report; approved procurement & quarry plan	+3.33%
3	USD 1.20M	After Gate 2	Ramp-up, working capital, operational readiness, scale-up	Operational readiness report; quarterly review; updated budget; ProjectCo approval	+3.34%

Total: USD 3.6M — total recognized equity after full payment: 10%, preserved according to the shareholders' agreement.

Page 5 — Governance and Protection

- Quarterly review every three months: financial, technical, operational, ESG/water, Data Room, risk register, next-quarter plan.
- Budget visibility and audit rights, limited to ProjectCo accounts.
- Controlled, permission-based Data Room access with logged usage.
- Reserved matters for material deviations — notification or approval rights, never operational control.
- Protected assets: Atlas Mining license position; AKANIL / HYRION technology and data architecture; founder shares; unrestricted geological data.
- The partner reviews, questions, and verifies. The partner does not direct day-to-day operations.

Page 6 — Proposed Next Steps

1. Execution of the Confidentiality Agreement (NDA).
2. Opening of the limited Data Room.
3. Execution of the non-binding Letter of Intent.
4. Focused due diligence on ProjectCo, the expansion plan, and the use-of-funds schedule.
5. Agreement of the indicative term sheet.
6. Preparation and execution of ProjectCo documentation (capital increase resolution, subscription agreement, shareholders' agreement, protocols).
7. Closing of Tranche 1 and activation of the quarterly reporting cycle.
